

APS

Altenergy Power Systems

THE MICROINVERTER COMPANY

COMPANY INTRODUCTION

COMPANY MILESTONES

July 2009

- Company founded in California by IC and solar industry veterans who had worked in the United States for 10 -20 years.

March 2010

- Raised 6.7M USD in funding from venture capitalists and a publicly listed company.
- Set up APS China in Jiaxing.

Feb. 2011

- Golden Sun, CQC certified .
- The 1st 4kW YC200 PV system installed on company building rooftop.

May 2011

- Installed the largest 116kW YC200 PV system with microinverter in Asia.
- Qualified 300,000 unit annual capacity.

August 2011

- SAA certified, CEC listed.
- 1.9kW YC200 PV system in Melbourne, Australia.
- Several thousand YC200 units installed in China

2011-12

- TUV and UL certified.
- Set up APS Australia.
- YC200 PV systems installed on grids in Sydney, Queensland, and Western Australia.

RESEARCH AND DEVELOPMENT

- 30+ R&D engineers, over 60% hold an MS degree or higher.
- Full range of equipment for product design, simulation, verification, testing, and reliability.
- Filed 27 patent applications, including three PCT applications; nine granted.
- APS created the first microinverter product in the world that was certified by CQC, SAA, TUV, and UL.

MANUFACTURING FACILITIES

- The R&D center and the manufacturing facilities share the same building.
- World-class EMS, specializing in high-end communication equipment and PCBA manufacturing.

RECENT PROJECTS

EXECUTIVE MANAGEMENT TEAM

ZHI-MIN LING

President and Chief Executive Officer | Co-founder
Member of the Board of Directors

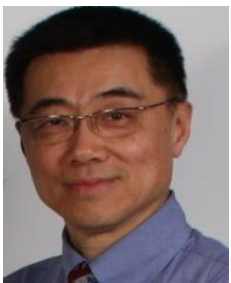

Dr. Ling graduated from Fudan University, received a Ph.D. from University at Leuven, Belgium, and conducted post-doctoral research at University of California, Berkeley. Dr. Ling served as senior staff at AMD, Senior Director at Xilinx, and Senior Vice President at Solaria, during which time he gained many years of experience in the semiconductor and solar photovoltaic industries.

YUHAO LUO

Chief Technology Officer | Co-founder
Member of the Board of Directors

Dr. Luo received a Ph.D. from University of California, Los Angeles, earned an M.S. in Microsystem and Information Technology from Shanghai Institute of Microsystem and Information Technology, Chinese Academy of Sciences, and earned a B.S. from Jilin University. Dr. Luo was a senior staff member at Xilinx and the Director of Product Development at Solaria. He has years of R&D experience in the semiconductor and solar photovoltaic industries.

WESLEY TONG

Chief Marketing Officer

Mr. Tong earned his M.S. in Electrical Engineering from Tsinghua University. Mr. Tong worked at Nortel in Canada and in the United States in communications product development, project management, and market development. He worked in China for 16 years as Marketing Director and Vice President in communication equipment and services as well as LED and photovoltaic power generation and implementation.
